

ON-SITE

Planned Maintenance

PROGRAM

A complete service plan designed to ensure that your generator will provide reliable electrical power...

Because you CAN'T afford to be without power.

PENN POWER SYSTEMS
Power Generation Systems Specialists

ON-SITE

Planned Maintenance

PROGRAM

Like any other equipment, your on-site power system needs periodic planned maintenance to keep it in top condition and ready to operate when the lights go out. The middle of a power failure is not the time to find out your system has problems. Penn Power Systems offers planned maintenance programs custom-tailored to your needs. These programs include regularly scheduled inspections, fluid and filter changes (environmentally safe disposal of used fluids), fluid analysis and complete testing of the system. Our maintenance programs enable us to find minor problems with your equipment and correct them before they become major problems. Planned maintenance does not guarantee you will never have a problem, but it significantly reduces the chances of it!

→ SERVICE PERFORMED TO FACTORY SPECIFICATIONS

We follow the manufacturer's guidelines for each specific machine. We provide product support for ALL makes of generator sets and fire pumps, including auto transfer switch and switchgear maintenance, inspections and repairs – put us to the test!

→ FACTORY-TRAINED SERVICE TECHNICIANS

We provide responsive, 24-hour Product Support Services performed by qualified, dedicated power generation "systems" technicians. Our maintenance and support vehicles are fully equipped and stocked for fast turnaround.

→ GUARANTEED, UP-FRONT, "NO HASSLE" PRICING

The planned maintenance requirements vary according to different applications. They range from routine visual inspections to full-load testing with portable load banks. We will provide a guaranteed, "up-front" price to meet your specific requirements.

→ NO ENVIRONMENTAL CONCERNS

We take care of all waste oil, filter and coolant disposal.

→ PERSONAL, "ONE-TO-ONE" SERVICE

We have dedicated Service Coordinators at each location assigned to your maintenance plan. They're responsible for scheduling, dispatching, notifying you about needed repairs and providing written follow-up reports.

→ ROUND-THE-CLOCK SERVICE AT MULTIPLE LOCATIONS

Penn Power Systems offers 24/7 parts and service support throughout Pennsylvania, central and western New York, southern New Jersey, and northern Delaware. A large rental generator fleet is available for temporary power requirements of any type.
